Bratz Jade – “Goin’ Out” Look (3D Sculpt Study)

A stylized character study focused on translating an existing doll design into a production-aware 3D model, including pose, hair, outfit, and faceup.

This project is a stylized 3D recreation of Jade from Bratz, based on her “Goin’ Out” look. The objective was to capture the character’s likeness while developing a fully posed sculpt, including hair, outfit, and attitude consistent with the brand’s aesthetic.

A primary focus was the faceup, recreating the original doll’s makeup through UV mapping and texturing to match the look of a physical product. The project also explores stylized hair sculpting, garment forms, and overall silhouette.

Tools: ZBrush • UV Mapping • Texturing
