Miniature Converse Lo Lab Sneakers

Collaboration with Converse

march 2026

Created in collaboration with artist Monsterlool for an exhibition celebrating the launch of the Converse Lo Lab sneaker by Nike and Converse (March 3–4). I was responsible for recreating the sneaker at Bratz doll scale, translating the original design into a miniature wearable accessory while preserving its key silhouette and details. The shoes were digitally sculpted, prepared for resin 3D printing, then physically printed, hand-finished, and painted for the final exhibition piece.

Tools: ZBrush • Resin 3D Printing • Hand Painting
